PowerCenter Users: Architect Your Future to the Cloud

Session 2 of 4:

The Best Way to Modernize from PowerCenter to the Cloud

Steve Holyer

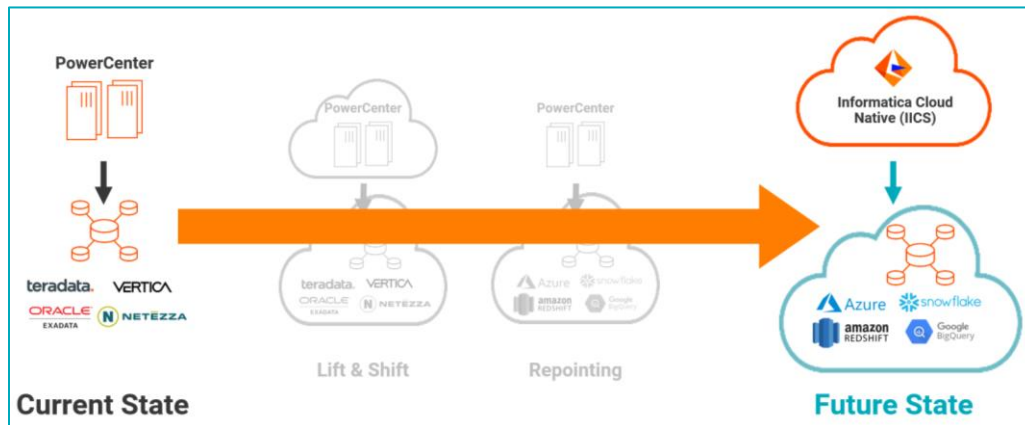

Informatica Cloud Specialist, Informatica

Rick Mutsaers

Principal Architect, Informatica

PowerCenter to IICS Modernization Program

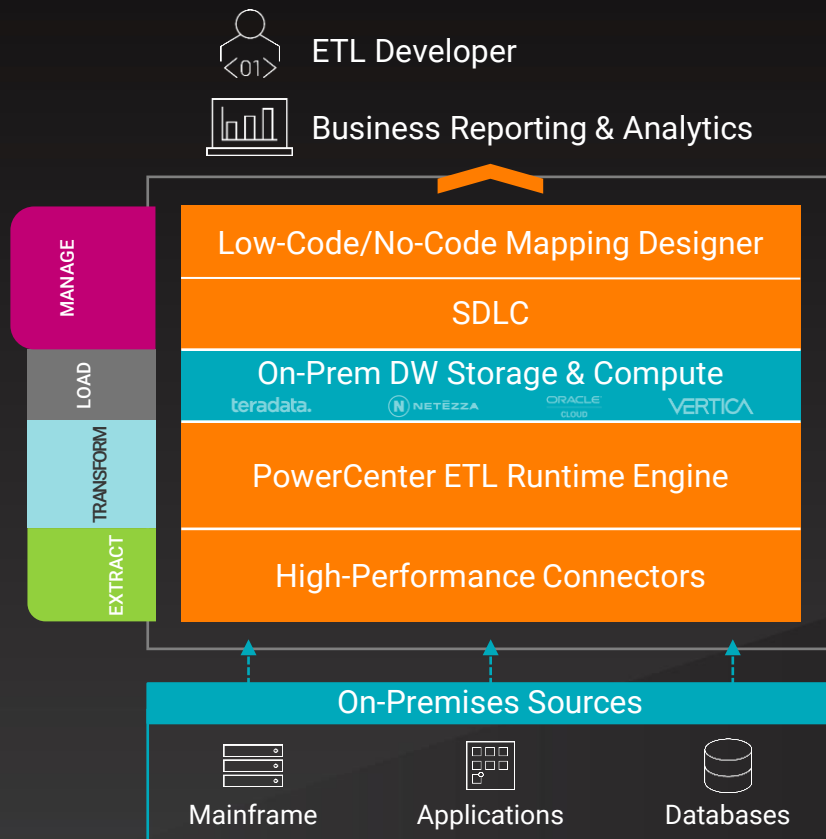

This Webinar Series: PowerCenter Users: Architect Your Future to the Cloud

On-premises	➔	Cloud Native
Annual Maintenance on a perpetual license	➔	Annual Subscription for Software as a Service
Fixed amount of processing cores	➔	Usage based model
Fixed set of products and options	➔	Remixable set of services
Customer provided and managed infrastructure	➔	Multi-tenant microservices based architecture managed by Informatica

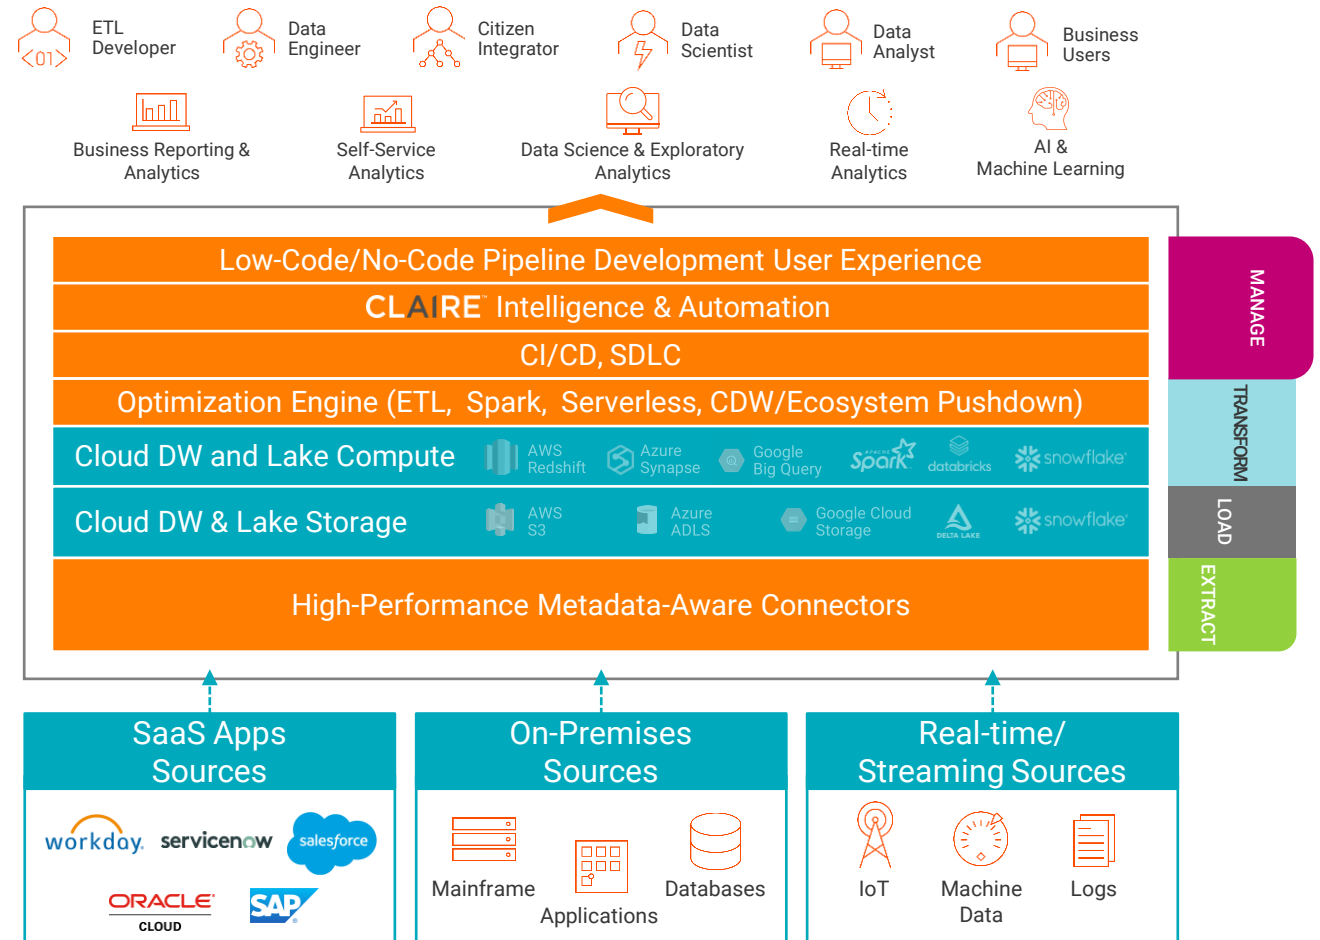

Why do I need a different
solution for my CDW
Modernisation?

PowerCenter for Traditional ETL for Star Schema

Informatica Data Management Cloud for Modern Cloud ELT for Cloud DW/L

IDMC much better suited for modern (cloud) analytics

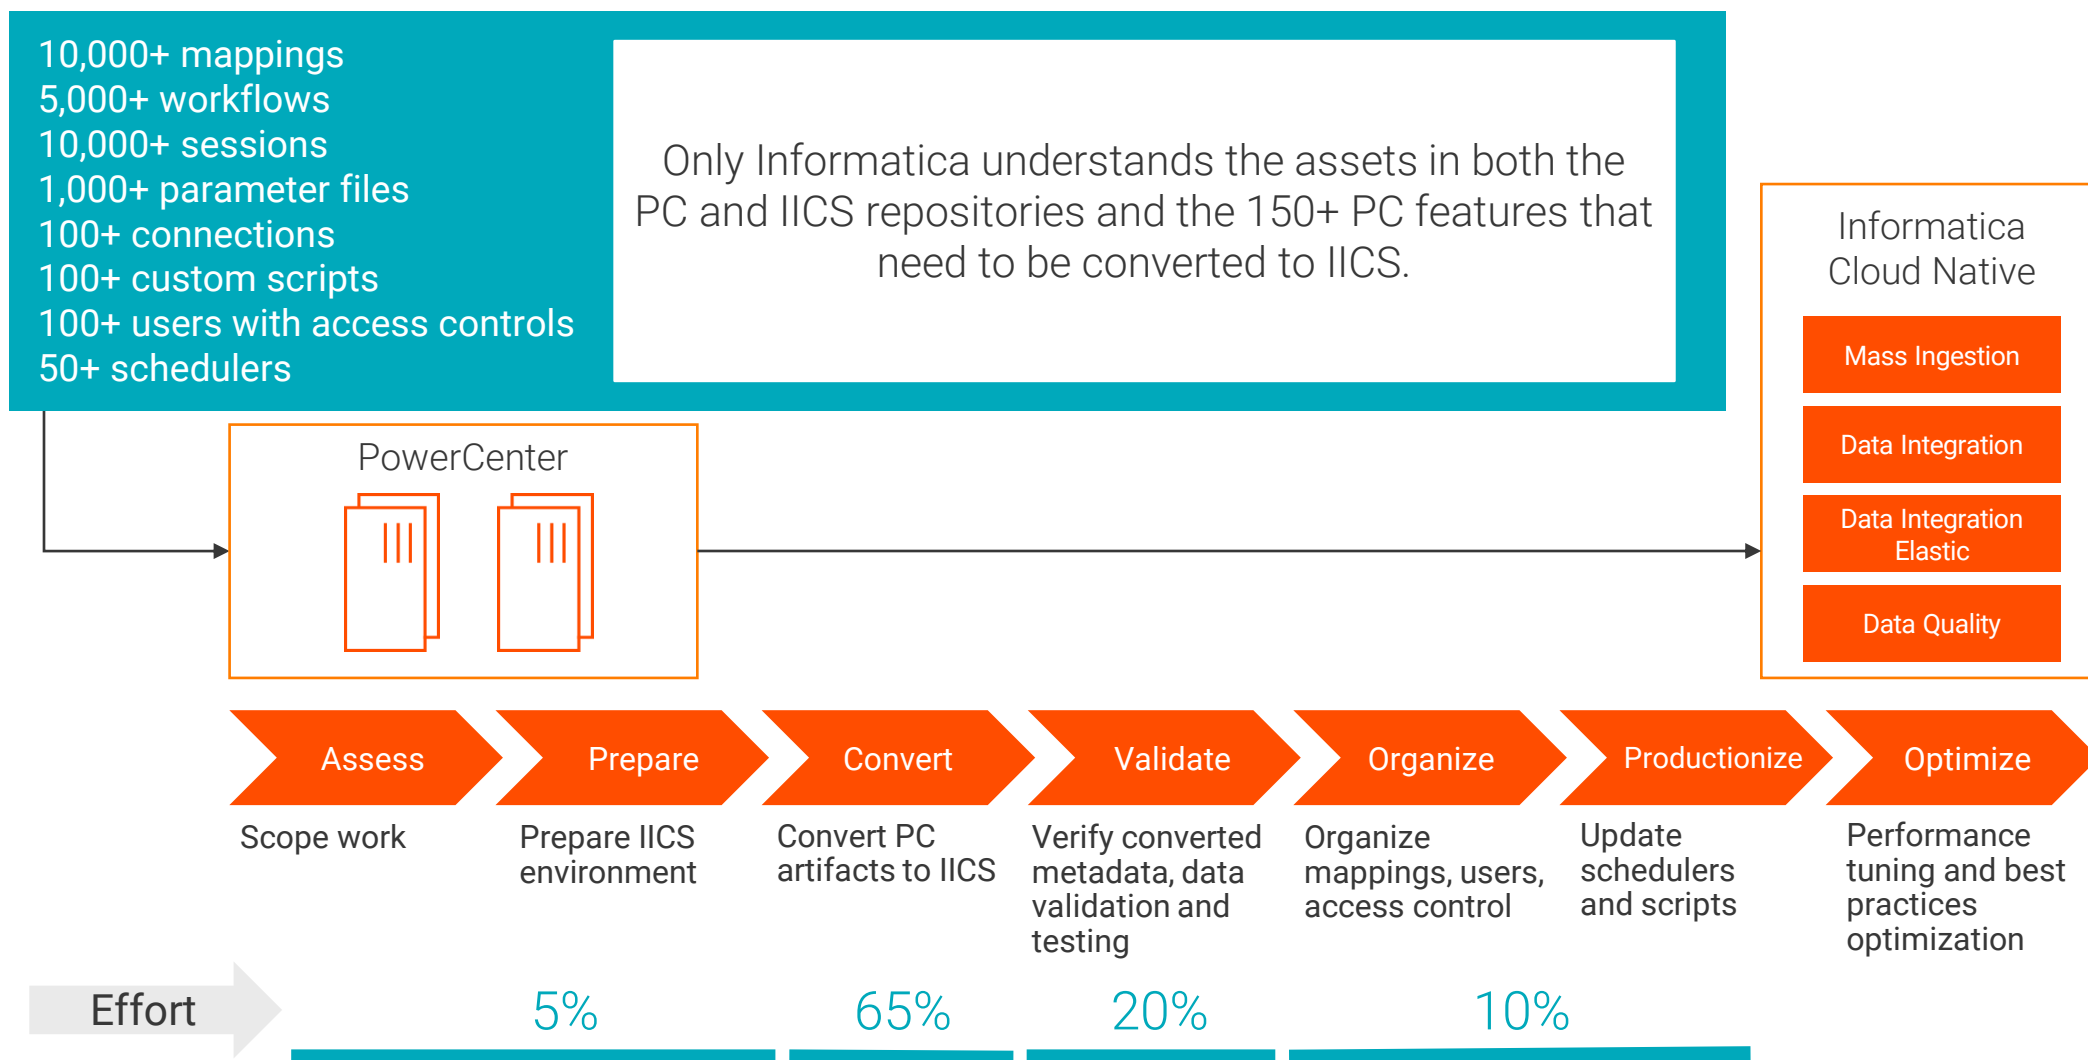

Cloud Modernization Solution for PowerCenter : Migration Factory

CDW Modernization Solution for PowerCenter

Fastest Path and Lowest Risk with **Out-Of-Box** Modernization Solution

	Package Component	Description
1	Cloud Native Products	Informatica Data Management Cloud Informatica Processing Unit (IPU) based access to Integration, Quality, Governance
2	Migration Factory	Assessment, Migration and Automation tools
3	Migration Support	Ongoing support of customer's existing PowerCenter environment through the migration
4	Professional Services	IPS services (included with migration factory) provided as part of this solution

Informatica's Migration Factory to Modernize PC to IICS

How does that work financially?
Do I pay for two solutions?

CDW Modernization Solution for PowerCenter

Financial incentives for loyal Informatica customers

	Package Component	Description
1	Cloud Native Products	Informatica Data Management Cloud Informatica Processing Unit (IPU) based access to Integration, Quality, Governance
2	Migration Factory	Assessment, Migration and Automation tools
3	Migration Support	Ongoing support of customer's existing PowerCenter environment through the migration
4	Professional Services	IPS services (included with migration factory) provided as part of this solution
5	Financial incentives	Credits on your annual PowerCenter maintenance or subscription bill Credits for the migration factory services

Why use the Migration Factory?

Comparing modernization options

Re-architecting

- Pro
 - Start fresh, fix modeling issues
- Con
 - Very **time consuming** (consider how long it took to build current architecture)
 - **High cost**
 - New tools = **new challenges**
 - **Double cost** during development of new solution

Re-platforming

- Pro
 - Get rid of current infrastructure **fast**, avoid double cost
 - **Low impact** to business since reports/dashboards don't change, only underlying technology changes
 - Build experience with new tech before modernize
 - Prioritize modernization at **no double cost**
- Con
 - There's a migration cost associated
 - Takes a bit longer to modernize (because you migrate first)

Faster

- Automated Migration utilities
- Migration Factory approach
- Reduced Time-To-Market

Cheaper

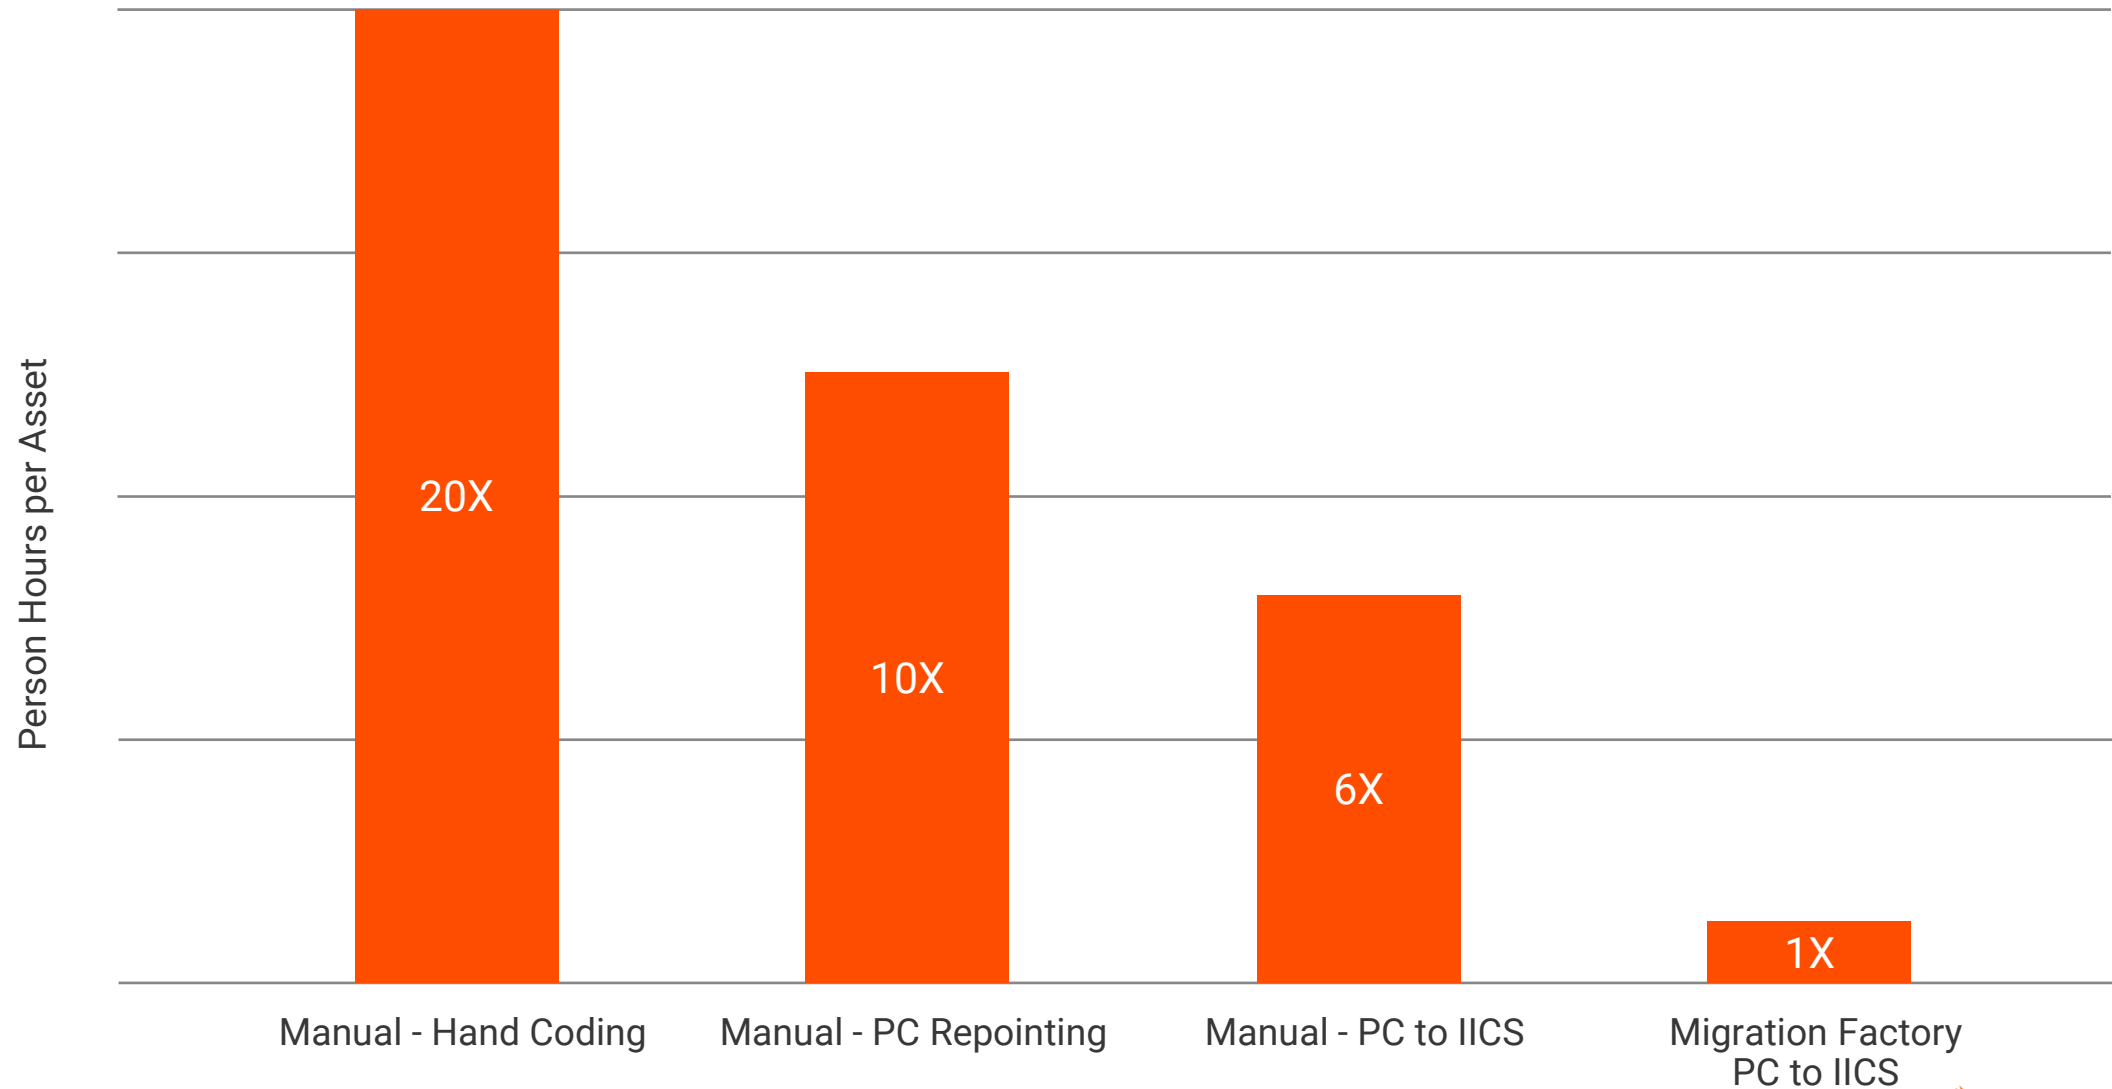

- Reduced time = less cost
- Higher quality code = less rework
- Less development resources

Less risky

- Code generation = less errors
- Predefined scope = less scope creep
- Shorter duration = less scheduling challenges

Time Comparisons for Different Approaches

What does the migration
factory process look like?

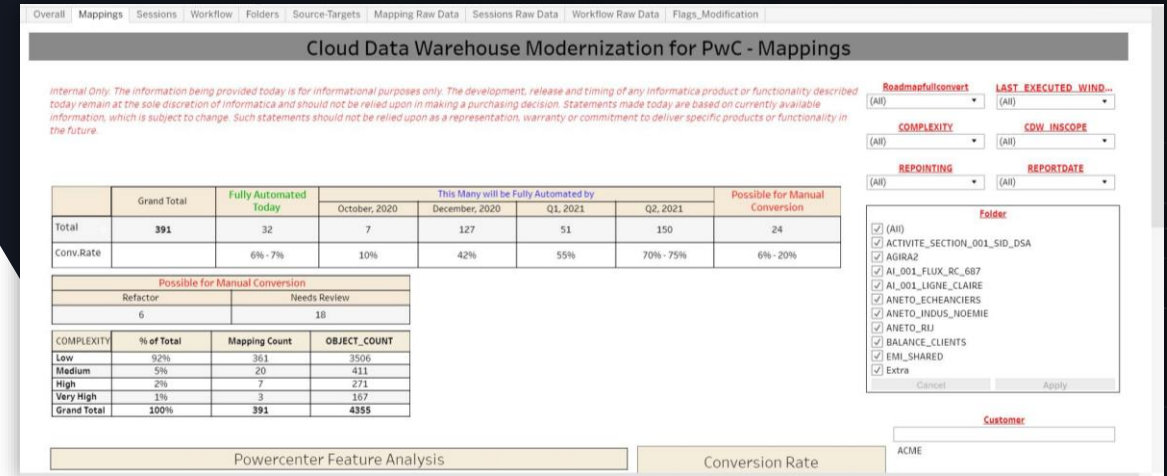

Two Parts to the Migration Factory

Assess

Intelligence

Analyze all PowerCenter assets (mappings, sessions, workflows) to get a full picture of what can be migrated using migration factory

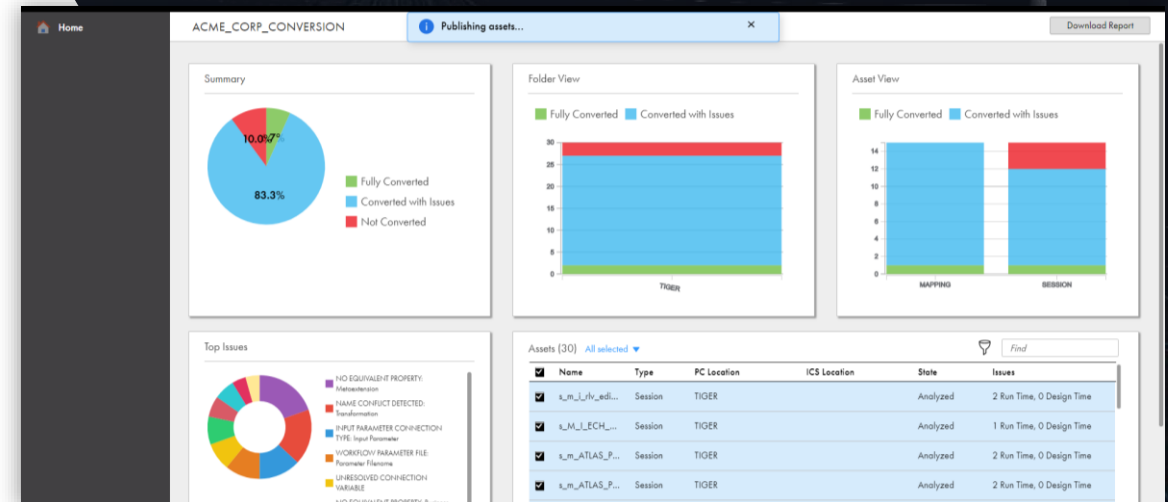

Migrate

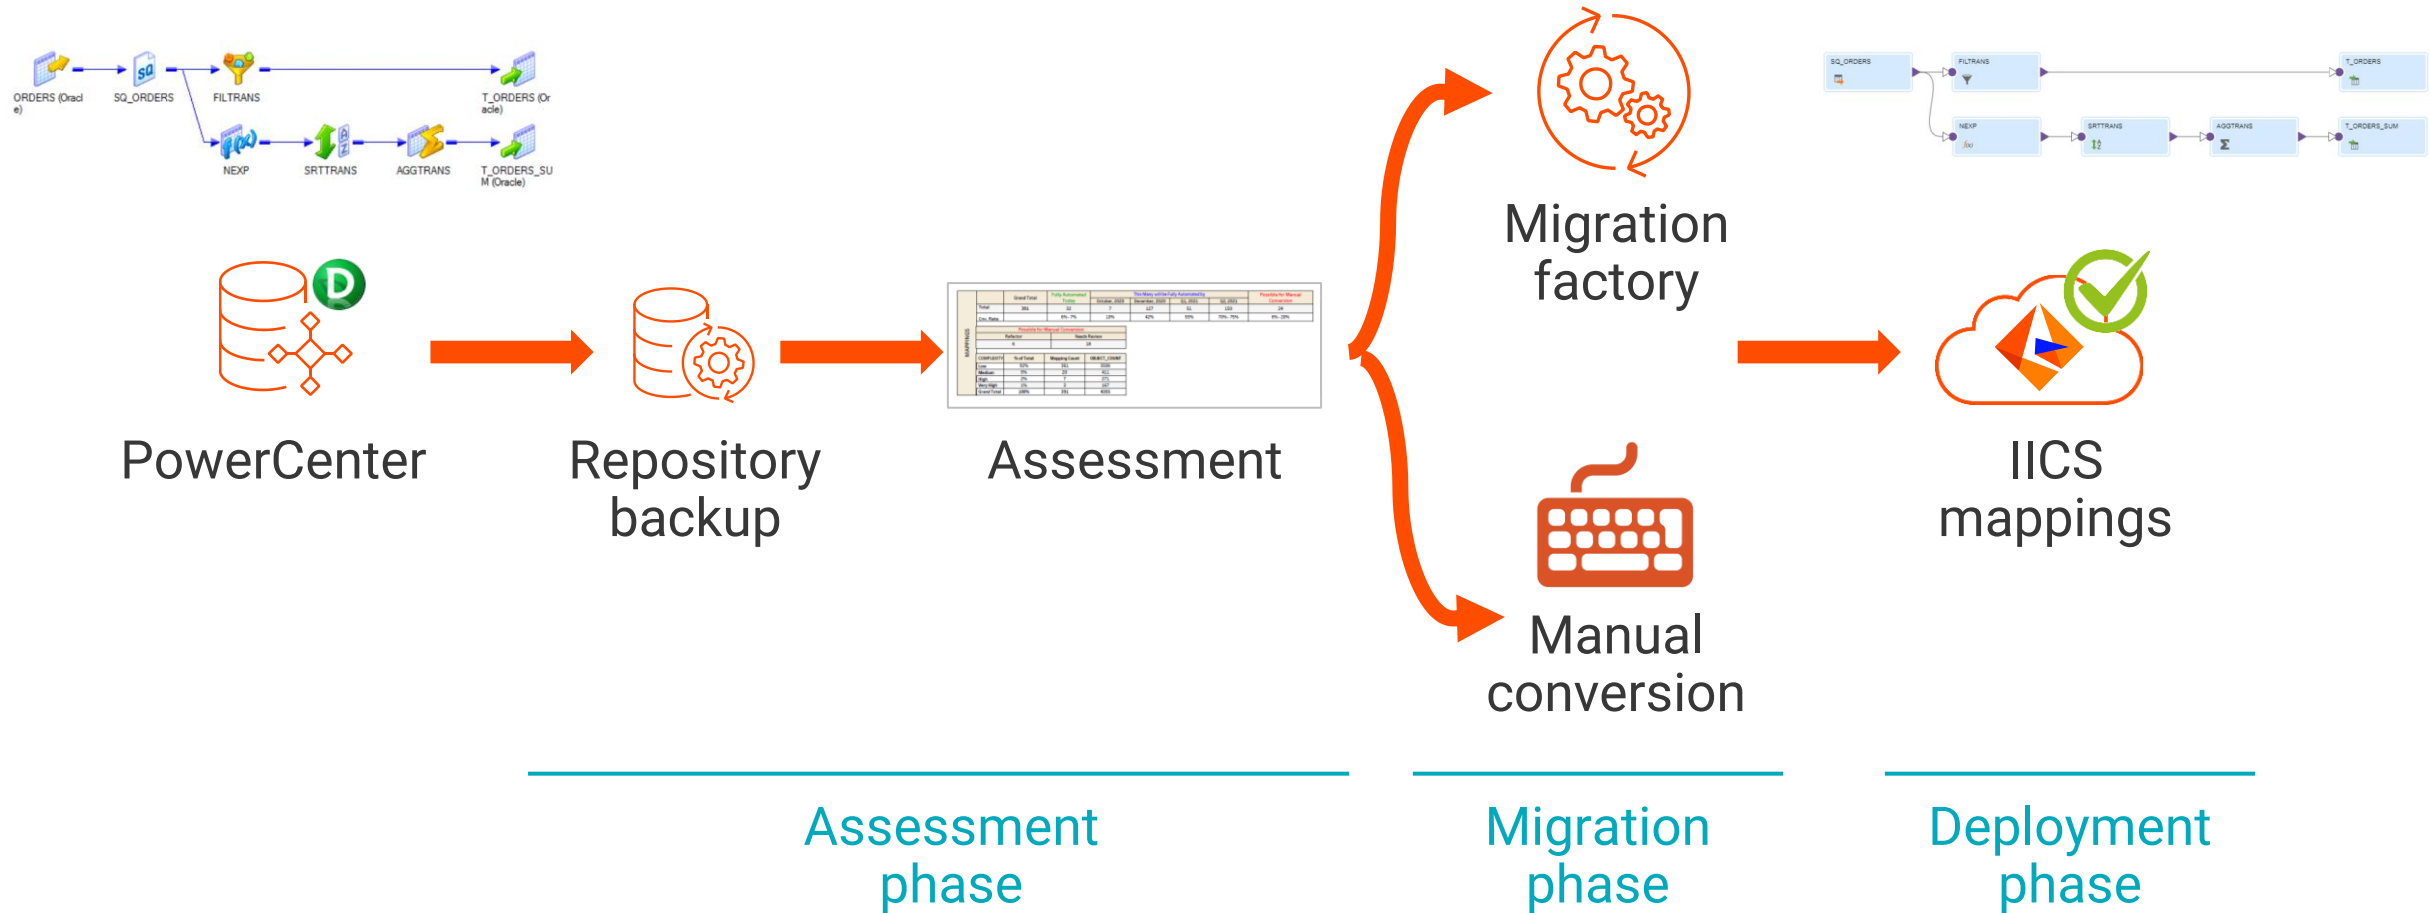

Automation

Migrates PowerCenter assets to IICS and repoints mappings from EDW to CDW and performs initial unit testing

Modernization process for PowerCenter customers

Customer, Informatica & Partner Collaborative Approach

Who does what in a PowerCenter modernization project

	ASSESS Scope Work	PREPARE Prepare IICS Environment	CONVERT Automate Conversion Manual Conversion Conversion Finishing			VALIDATE Unit Testing	ORGANIZE Mappings, Users, & Access control	OPERATIONALIZE Update Schedulers & Scripts	TEST Data Validation & User Acceptance Testing	OPTIMIZE Performance Tuning & Best Practices
Informatica Migration Factory	✓		✓		✓	✓				
Partner		✓	✓*	✓	✓*	✓	✓	✓	✓	✓
and/or										
Customer		✓		✓		✓	✓	✓	✓	✓

* Starting in 2022, select partners will be able to run migration factory in support of end to end migration projects

Demonstration

How does it work?
